

# Phycoterra® ST

## WHAT IS PHYCOTERRA® ST?

Phycoterra® ST is an award-winning, innovative microalgal seed treatment produced to supercharge the seed and the immediate soil microbiome around the seed by adding a high-quality carbon source to the coating. The unique mode-of-action wakes up the microbes in the spermosphere, which helps improve crop establishment to promote higher yield potential – all while being applied at low rates.

### FEATURES

**Unique mode-of-action with proven on-farm results**

### BENEFITS

- Improves microbiome for both the seed and immediate soil around the seed at planting (spermosphere) with inert microalgae superfood
- Delivers superior food source to microbes that optimize germination, early vigor, faster-developing root structure, and improved stand establishment
- Offers low application rates with notable, consistent ROI & yield increases

**Compatible & flexible to use in existing seed treatment programs**

- Compatible with other seed treatment blends (fungicides, insecticides and inoculants) and nematicide/soybean SDS mixtures
- Easy-to-use with no special equipment needed for application or special storage requirements.

Available in 2x2.5-gallon jugs, 14-gallon kegs and 250-gallon totes.

## RECOMMENDED APPLICATION RATES:

<b>CORN</b>	2-5 oz/CWT	<b>DRY BEANS</b>	1.5-4 oz/CWT
<b>CEREAL GRAINS</b>	2-5 oz/CWT	<b>PEAS</b>	1.5-4 oz/CWT
<b>CANOLA</b>	2-5 oz/CWT	<b>LENTILS</b>	1.5-4 oz/CWT
<b>COTTON</b>	2-4 oz/CWT	<b>COVER CROPS</b>	2-4 oz/CWT
<b>SOYBEANS</b>	1.5-3 oz/CWT
